

The Advantage in Web-Based Software

Living in the Information Age has its advantages.

Unlike the computer-driven society of the late 20th century, the Internet today lets you to access the World Wide Web from your workstation or your PDA, at home or in transit.

Your booking calendar can be just as accessible with web-based technology.

Web-based technology does to booking what ATMs did to banking. With an ATM, you can always take out what you put in. With EventBooking.com, all the information and documents you upload can be accessed by you from any Internet workstation worldwide.

Your data is secure with password-protected EventBooking.com user accounts. You can't lose it, break it, or fail to upgrade it when all you have to do is log on.

No IT involvement is required. All you need is a standard Internet browser to run web-based software.

Why go with EventBooking.com?

Ten years of dedicated service to the entertainment industry and 300 top clients have taught us what you need to be competitive.

Every client is unique. We think your booking program should be customized for you. You will never feel like a number with our direct-line customer service!

Do you work with a team? Clients like SMG, Global Spectrum, AEG, Arena Network and Disney Theatrical prefer EventBooking.com so they can work on the same page from the same information.

Access the portal. Do you need a staffing solution? Why not go web-based? EventBooking.com integrates with best-of-breed partner companies.

Going green? Do you want to avoid paper and printing costs? Conserve the green in your environment (and in your wallet) with customized user access.

When your colleagues can log in and view the same calendar that you can—based on highly customized permission levels—you don't have to print the calendar.

Say goodbye to spam and hello to instant chat with EB Network, coming in 2010!
